PROFILE

Junior Full Stack Developer with a background in media. Recently graduated from Le Wagon intensive **Web Development Bootcamp** and completed a group project building a website recommending movies to users. My **passion for frontend development**, coupled with media background, enables me to deliver engaging digital experiences that resonate with users. Looking forward to contributing to your team's success.

PROJECTS

MovieMojo

Automated Movie suggestion Web app for recommending movies based on users preferences. In a team of 4, we used Ruby on Rails, APIs, JavaScript and more. Further development planned: improving our algorithm for better film recommendations.

HelPet

Online platform designed to arrange a temporary companionship with emotional support pets. Users can rent a pet or create a profile of their pets and search for location or specific animal.
